

Two Part Liquid Adhesive Instructions

Liquid Adhesive

Apply to one surface only. Position and join parts. Hold tightly for 10 seconds. Full set occurs immediately. Snap cap over nozzle tip securely to reseal. (For spills or body contact flush with water).

Liquid Adhesive Accelerator

Remove cap and install pump sprayer, use directly from container. Can be applied to surfaces prior to application of adhesives or applied over liquid adhesive to accelerate the curing time. Can influence overall strength of adhesive bonds. Use sparingly.

Note:

Remove pump sprayer and replace shipping cap for storage to prevent evaporation.

Store in cool dark place.

Can be refrigerated for storage.
